application designed specifically for helping you retrieve the product keys of your Windows operating system (2000, XP, Vista, 7) and MS office. The advantages of being portable Since this is a portable program, it is important to mention that it doesn't leave any traces in the Windows Registry. You can copy it on any USB flash drive or other devices, and take it

with you whenever you need to obtain your Windows and MS Office product keys on the breeze, without having to go through installation steps.

Minimalistic panel There's not much to brag about the user interface, as you are welcomed by a small panel that embeds only a few configuration settings tinker with. Everything is designed as simple and clear as possible, so even less

experienced users can learn to master the entire process in no time. Main features As soon as you run Win Key View Serial Key, it automatically displays the product keys in the primary panel. What's more, you are allowed to copy the information to the clipboard, so you can easily paste it into other third-party utilities. Performance Since it doesn't bundle any configuration

settings, the entire process seems nothing but a child's play. During our testing we have noticed that Win Key View carries out a task quickly and without errors. It is quite friendly with system resources, so the overall performance of the computer is not hampered.

Bottom line All in all, Win Key View offers a simple software solution for helping you view the product keys of

your Windows operating system (2000, XP, Vista, 7) and MS office. On the downside, you cannot export the information to a file and gather the product keys for other applications that are installed on your system.
