As a newly fired bus driver, you find yourself standing in front of a windowless concrete plane-thing that nobody wants. The plane-thing comes to life and tells you that you're now the pilot of its flying saucer. It was last seen in the Bermuda Triangle; not long ago, that is. You have to guide your saucer through a series of surreal environments to the mysterious planet of Faraday. With your trusty "dungeon-crawling" bat as a new companion, you begin your adventurous flight to the planet of Faraday. Along the way, you'll meet new characters, perform new stunts, and navigate through a series of surreal environments. As you play, you'll encounter eight magical places, each with its own unique theme. Armed with your trusty dungeoneer, you'll battle enemies, explore hidden secrets, and solve puzzles to reach the planet's ultimate fate and conquer its strange inhabitants.
